For: LIQUID-CRYSTAL DISPLAY DEVICE AND COLORED RESIN SUBSTRATE

AMENDMENT UNDER 37 C.F.R. § 1.111

Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Office Action dated December 23, 2002, please amend the above-identified application as follows:

IN THE SPECIFICATION:

The specification is changed as follows:

Page 4, fifth paragraph:

91

The liquid-crystal display device according to the present invention comprises a liquid-crystal panel which includes: a back side substrate constituted by a colored resin substrate having an electrode; a visual side transparent substrate having a transparent electrode; and a reflection type liquid-crystal layer interposed between the visual side substrate and the back side substrate. Fig. 1 shows an example of the liquid-crystal display device. In the device, a back side substrate 1 includes a colored resin substrate 11, an electrode 12, and an aligned film 13. A visual side substrate 2 includes a transparent substrate 21, [a transparent substrate] an electrode 22, and an aligned film 23. The reference numeral 3 designates a reflection type liquid-crystal layer.
